

# Expand Your Horizon

## The Wrist Acceleration Program

Are you a born leader dreaming of making an impact in an international leading organization, with a global footprint and colleagues from around the world? And are you looking for a graduate program, where the only limits to your learning experience are your own capabilities and desires to learn and evolve? Then keep reading!

Introducing the Wrist Acceleration Program, where we offer you the best possible framework for growth, advancement and development of your business persona and skills.

[wrist.com](http://wrist.com)

Wrist is the world's largest ship and offshore supplier, employing 1,600 people and conducting operations all over the world.

We run an international and professional business, and for the challenges of tomorrow, we need smart, skilled and resourceful employees.

## The Wrist Acceleration Program

The Wrist Acceleration Program is an intensive 2-year journey designed to prepare you for becoming part of Wrist's International talent pool. The Program centers on your professional development, with most of your time spent working a real job within the core disciplines of sales, procurement, logistics and warehouse operations. Working under the guidance of a senior executive, who will be your personal mentor, you will learn efficient decision-making and develop your own professional network. We offer a fun, energetic and challenging work environment.

The Program is built on practical learning. During the two years, you will be assigned to a business unit, where you will be part of the daily operations. This way, we ensure that you will have an excellent understanding of the ship supply operations at the time of graduation.

To supplement the practical education, you will participate in classroom training at four weeklong modules during the two years. The training will take place in Wrist's headquarters in Denmark, where you will join your fellow WAP colleagues from around the world for a week of concentrated learning about business and leadership.

During the modules, you will work on challenging real-life business dilemmas and prepare presentations with your recommendation to the Company's senior management team. You will feel stretched and tested during these four modules, and through this process, you will get to know your own leadership style. We believe that the combination of "on the job"-training and classroom learning will give you the best possible start for a progressive career at Wrist.

You are eligible for applying if you hold at least a Bachelor's (or similar) degree, preferably within disciplines such as Logistics, Operations, Supply Chain Management, Sales & Marketing, Process, Finance, maritime or International Business programs.

You must be fluent in English and comfortable in a changing and dynamic work environment. If this sounds interesting to you, we strongly encourage you to apply.
