## EARMUFFS features

The NJORD earmuffs offer you maximum user comfort and hearing protection with its unique adjustable earcup design and high certification standards on noise reduction.

With NJORD you can always expect:

- Protective equipment for maximum safety
- Premium quality and consistency in products
- Global availability and standardization

### EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

## EARMUFFS features

The NJORD earmuffs are professional earmuffs with high noise reduction according to SNR32dB and provide a very high user comfort.

The earmuffs are specifically designed with additional space inside the ear cups to relieve pressure on the ears while still being lightweight and therefore allowing the user to wear the earmuffs for longer periods of time.

The stainless-steel bracket allows adjustments of both angle and height for extended comfort and optimal fit.

The earmuffs are suitable to be used with loud machinery, engines, industrial machines and power, and pneumatic tools.
