## ANTI-IMPACT GLOVES features

The NJORD anti-impact and vibration gloves offer you maximum comfort and protection with their ergonomic, anti-impact and cut-resistant design and materials.

With NJORD you can always expect:

- Protective equipment for maximum safety
- Premium quality and consistency in products
- Global availability and standardization

### EXPECT MORE

In Norse mythology, Njord was the patron of seafarers and the god of wind and waters. These characteristics have been transferred to our NJORD product line providing expert care to seafarers when they sail the seven seas.

## ANTI-IMPACT GLOVES features

The NJORD anti-impact and vibration gloves are a 13-gauge high performance glove for working in extreme conditions with high exposure to hand impact by material or equipment.

The gloves are made of a cut-resistant yarn and are certified to cut resistance level 5 according to EN388:2016 standards for working gloves, which is the highest possible approval within cut resistance.

The gloves also have an anti-vibration gel palm and a TPR panel together with finger and knuckle protection to protect the user in rough and dangerous environments while working with heavy equipment and materials.

It is a pair of heavy duty outdoor working gloves specifically designed to protect the user in environments, where there is a risk for finger and hand injuries.

Item no.:	IMPA code:	Product name
1466411	314510	GLOVES ANTI-IMPACT HI-VIS ANTI-VIBRATION CUT-RESISTANT LEVEL 5 NITRILE

### Specifications:

- » CE certification
