

WRIST CONTINGENCY PLAN

To deliver on our mission “Making our customers’ life at sea better” and to keep both our staff and seafarers safe, we are managing a large number of protective measures in our daily operations.

SHIP SUPPLY

Staff rotation

All Wrist locations operate on a shift system, with all staff being split into teams, enabling us to minimise the gathering of staff in one place and to continue to operate the business and deliver supplies.

Travels or visitors

All business travel and visitors on our premises are prohibited until further notice. Instead we facilitate external meetings by Skype, video conference or phone calls.

Cleaning

Deep cleaning is performed between shifts, and each staff member has the obligation to wipe down their work station daily with antiseptic wipes, including to take all the necessary personal precautions, notably hand hygiene and social distancing.

Boarding

We will not board any vessels or get in physical contact with officers and/or crew. Our driver will call you to arrange the delivery and keep a safe distance before your crew attend to the pallets.

Cash payments

We kindly ask you to prepare the agreed amount in an envelope beforehand and pass it on to our representative either by using the lifting basket or by making the transaction at the bottom of the gangway between the captain/ crew and our representative only. ***Masks and gloves should be worn by both parties.***

Vendors and products

With our global scale and scope, we command privileged supplier relationships and can secure robust supply globally. With our unique global footprint, we are able to support your vessels and facilities all over det world.

Protect yourself and others

- Regularly wash your hands with warm soapy water for at least 20 seconds
- If you cannot wash your hands, use alcohol wipes/ sanitizer – minimum 75%
- When coughing, use a tissue & dispose of, or into the crook of your elbow
- Practice social distancing by keeping a least 2 meter/6 feet distance - anytime, anywhere
- Do not leave your household except for going to work, individual exercise and for essential food shopping – and this as infrequently as possible. Do not invite people into your household
